IMPORTANT RISK INFORMATION

The following is a brief summary of important risk information for the AngioDynamics Schon XL® Acute Hemodialysis Catheter. For detailed information on the categories referenced, please consult the instructions for use packaged with each device. Observe all instructions prior to use. Failure to do so may result in patient complications.

INDICATIONS FOR USE: The AngioDynamics Schon XL Acute Hemodialysis Catheters is designed for acute

hemodialysis and apheresis. It may be inserted percutaneously and is ideally placed in the internal jugular vein. Although this catheter may be inserted into the subclavian or femoral vein, the internal jugular is the preferred site.

CONTRAINDICATIONS: AngioDynamics Schon XL Acute Hemodialysis Catheter is not intended for any use other than indicated in the instructions for use. Do not implant catheter in thrombosis vessels.

WARNINGS AND PRECAUTIONS: Please see package insert for complete list of warnings and precautions.

POTENTIAL COMPLICATIONS: Consult package insert for a complete list of potential complications.

CAUTION: Federal (USA) law restricts these devices to sale by or on the order of a physician.
